DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 5, 9 and 10, the previous art of record teaches of a radio communication system and method comprising a maintenance terminal; a first base station configured to adjust the phase of a frame signal according to a GPS signal when a predetermined re-synchronization time is reached, and transmits the frame signal; and a subordinate base station which, upon reception of the frame signal from the first base station, is configured to adjust the phase of an internal frame signal to coincide with the thus received phase of the frame signal, where the first base station adjusts an internal clock operating according to a line clock based on a time matching signal transmitted from a maintenance terminal.

The previous art of record fails to teach where the first base station is further configured to **adjust an internal clock operating according to a line clock based on a time matching signal transmitted from the maintenance terminal.**

Claims 2-8 and 11-12 are dependent upon claims 1, 5, 9 and 10; therefore, the examiner gives the same reasons for allowance as set forth in claims 1, 5, 9 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
